**COMMEMORATIVE
PROGRAM**

TOTAL SOLAR ECLIPSE OF APRIL 8, 2024

POWERED BY THE WACO TOURISM PUBLIC IMPROVEMENT DISTRICT

WELCOME TO THE ECLIPSE OVER TEXAS: LIVE FROM WACO!

In 2021, Baylor University, Lowell Observatory, Discovery Channel and the City of Waco embarked on a collaborative endeavor to bring you this extraordinary experience on April 8, 2024, showcasing the final Total Solar Eclipse in North America until 2044.

As you experience the Great American Eclipse along the banks of the Brazos River, we hope you enjoy the heart of today's festivities: world-class educational opportunities including science talks, telescope viewing sessions and interactive activities in our STEAM Zone, highlighting science, technology, engineering and math. From children to adults, attendees of all ages will find themselves enthralled by the diverse offerings.

The success of this event is only made possible through the work of many dedicated individuals and the generous support of our sponsors. We extend our heartfelt gratitude to each attendee for being part of this unforgettable event.

Enjoy the eclipse and all the wonders it brings.

PARTNERS

ECLIPSE VIEWING SAFETY

Please use your solar glasses to look at the sun.

The glasses may be removed during the 4+ minutes of totality.

There will be an announcement on the speaker system to mark the beginning of totality.

There will be another announcement when totality ends. At that time, you must again use your glasses to view the sun.

TAKING PHOTOS SAFELY

We recommend you skip photographing the eclipse, and just experience it. There will be plenty of professional photos you can look at later.

Do not look at the sun through your phone as you can damage your eyes.

A solar filter is the best way to photograph the eclipse with a smartphone. The phone may be damaged if you expose it to the sun for too long without a filter.

You can safely photograph or video the sun during the 4+ minutes of totality.

Livestream of the eclipse will be available from Discovery Channel. [youtube.com/@discovery](https://www.youtube.com/@discovery)
